Active ingredients for functional benefits

**RiceSilk<sup>®</sup>**

Vegetable base sensory modifier

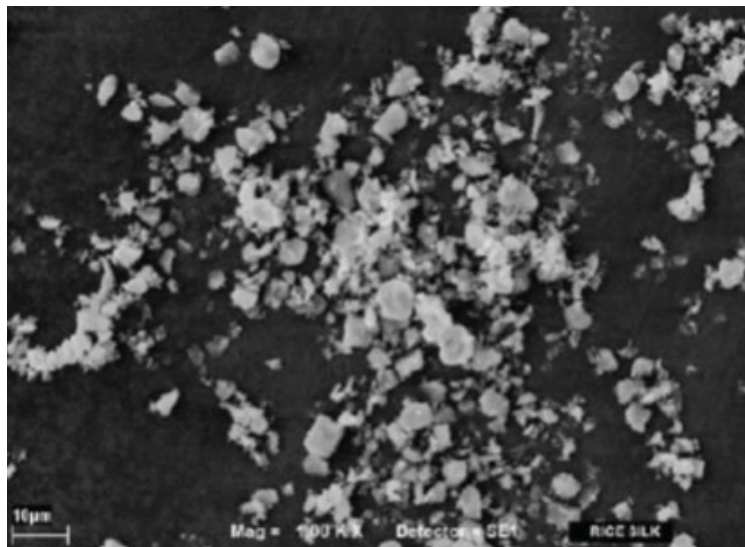

# Rice Silk®

## Technology:

Vegetable sensory modifier obtained from rice husk (*Oryza sativa* L.) through a modern process of micronization. Rice Silk is an **alternative ingredient to synthetic micro beads and offers to skin care products a silky sensory touch.**

## Sensory benefits:

1. Silk touch and smoothness to skin care products.
2. High capacity of oiliness absorption.
3. Matte effect.
4. Improves spreadability of skin care emulsions.
5. Absorbs excess of transpiration in AP/Deo formulations.
6. Reduce oil migration in lipstick formulations.
7. High coverage properties in low dosage (low value g/cm<sup>2</sup>).

RiceSilk - Capacity of oil absorption: >300% of its weight.

## Use and Recommended dosage:

### *Skin Care products*

Recommended dosage: 0,5 – 5,0% in emulsions for Acne treatment, Oiliness control, Moisturizers, Make up products, Sunscreens, AP/Deo, Talc and Bar soaps.
