

# Phyto.CARE AOX

Advanced Protection System  
Multiphase Phyto-Synergy

## Proven results:

- Strengthening the skin's natural defenses
- Collagen protection
- Antioxidant action: against oxidative and nitrosative stress
- Protection against damage to DNA
- Calming and anti-inflammatory action
- Luminosity and radiance

## Benefits for the formulator:

- Innovative technology
- Concept aligned with the main trends in Skincare
- Excellent cost-benefit ratio
- Contributes to the emollience and better spreadability of the final formulation

## Smart Phytocompatible Extraction:

Obtained through a **smart extractor system** composed of bioesters that enable **more efficient extraction of phytochemicals** with different characteristics and polarities

## Composition:

Balance of botanical extracts and isolated active ingredients, **with recognized antioxidant properties** that promote advanced protection against oxidative stress and environmental aging

## Benefits for the consumer:

- Improvement of the skin's overall appearance
- Radiant and luminous skin (*glow effect*)
- Fights photoaging
- Exposome Protection
- Prevents irritation and redness
